

Environmental Policy

Fibo-Trespo AS will have good working environment and we do not want to damage the external environment through harmful emissions, noise or other effects. This is also considered through our purchase of raw material. In the areas possible, we shall use PEFC™ certified material

Our goal is that employees will leave work with the same good health as when they arrived at work.

We work closely together with the Health service monitoring the status

Efforts to prevent injuries due to accidents and work stress are as important as the work of manufacturing, engineering and economics.

Efforts to reduce emissions are as important as the work of manufacturing, engineering and economics.

We should have an open relationship with the local community and government through active communication.

We strive to comply with PEFC™ requirements and prevent illegal raw materials to come inside the value chain.

Action plan for achieving this

Safety is a part of line management's responsibility, and is a part of every morning meeting in the production and also a part of the management meetings

All employees are using and expanding their knowledge in finding and removing causes of accidents and health damage.

All employees are using and expanding their knowledge in finding and removing causes of harmful emissions

Ensure to give all employees the necessary training

Use our HSE plan active
